

Imam Hudzaifah

Parepare, Sulawesi Selatan | +62 853-4261-4904 | imamhudzaifah@gmail.com

An AI-assisted Software Developer and Computer Science student with hands-on experience in full-stack web development, backend systems, frontend development, and intelligent systems. Skilled in leveraging AI-powered development tools to accelerate coding workflows, solve technical problems, and build scalable software solutions. Experienced in working with Laravel, PHP, JavaScript, React, Next.js, Python, and MySQL. Passionate about exploring emerging technologies and combining human problem-solving skills with AI capabilities to deliver efficient, practical, and reliable digital solutions.

EDUCATION

BACHARUDDIN JUSUF HABIBIE INSTITUTE OF TECHNOLOGY **2023 - Present**
Computer Science | 7th Semester | GPA: 3.67/4.00

PROFESSIONAL EXPERIENCE

OWEN GROUP **March 2026 - Present**
Website & Systems Developer

- Contribute to website development and maintenance in collaboration with the development team.
- Develop websites for Botox & Filler Lab, a beauty clinic based in the United States.
- Develop a sales and inventory management website for Peptide OS, a US-based supplement business.
- Develop frontend and backend features and integrate systems with databases.
- Perform website maintenance, debugging, and technical troubleshooting based on project requirements.

ACADEMIC PROJECTS **2026**

Campus Communication Forum Website Development

- Contributed to the development of a communication forum and community website to support student interaction and communication at Bacharuddin Jusuf Habibie Institute of Technology.

Village Service Digitalization - Community Service Program (KKN)

- Developed five websites to support the digitalization of public services, information, complaints, and mapping at the village administrative level in Parepare City, Indonesia.

Intelligent System Based on Computer Vision & Machine Learning

- Developed a Computer Vision system to detect and analyze the geometric profiles of rice field embankments.
- Implemented a Decision Tree-based Machine Learning model to support system navigation decision-making.
- Utilized Python, OpenCV, YOLO, and data processing techniques throughout the system development process.

ADDITIONAL EXPERIENCE & ACTIVITIES

AL-ISTIQAMAH MOSQUE, PAREPARE CITY **2021 - Present**
Mosque Caretaker & Call to Prayer (Adhan) Caller

- Serve as a mosque caretaker and Muadzin, supporting the smooth operation of daily mosque activities.
- Handle IT-related issues, electronic equipment, and electrical systems based on the mosque's facility needs.

HIKING & MOUNTAINEERING ACTIVITIES **2023 - Present**

- Actively participate in hiking and exploring various mountain peaks and mountainous areas across South Sulawesi, Indonesia.
- Experienced in navigation, trip and equipment management, and adapting to diverse terrain and environmental conditions.

TECHNICAL SKILLS

Web Development & Systems

- Develop and maintain websites using Laravel, PHP, JavaScript, HTML, and CSS.
- Design, manage, and process databases using MySQL.
- Develop web-based information systems and digital service solutions.
- Develop and integrate REST APIs and API-based services.
- Manage source code and collaborate on development projects using Git and GitHub.

AI-Assisted Development & Tools
Tools: ChatGPT, OpenAI Codex, Claude, and Claude Code.

- Leverage AI-powered coding assistants to accelerate software development, improve code quality, and streamline development workflows.
- Utilize AI tools for code generation, debugging, refactoring, technical problem-solving, and software architecture exploration.
- Apply AI-assisted workflows across frontend development, backend development, API integration, and database management.
- Evaluate, test, and refine AI-generated code to ensure functionality, reliability, and alignment with project requirements.
- Integrate AI into the software development lifecycle to improve productivity and development efficiency.

Artificial Intelligence & Data Processing

- Perform data processing and analysis using Python.
- Apply Machine Learning techniques in data-driven system development.
- Develop Computer Vision applications using OpenCV and YOLO.
- Perform object analysis and information extraction from visual data.
- Implement data-driven decision-making based on analytical results and system processing.
- Deploy and integrate Machine Learning models into applications through APIs.

PERSONAL SKILLS & LANGUAGES

Personal Skills: Integrity, Responsibility, Leadership, Attention to Detail, Time Management, Adaptability, and Teamwork.

Languages:

- **Indonesian - Native**
- **English – Basic Proficiency**
